EDUCATION AND QUALIFICATIONS

University of Kent
MSc Data Science

from Sept 2025 - date

Anglia Ruskin University (Cambridge).

BEng. Computer Science (Hons).

TECHNICAL SKILLS

Proficient: Microsoft Office suite (Word, Excel, PowerPoint, Outlook, Access), Python, SQL, Tableau, NumPy, Matplotlib, R, Active Directory, CRM, deep learning, Machine Learning

Familiar: Power BI, AWS, Nodejs, Pandas, R, C, HTML, Microsoft Windows Server, LLM, PowerShell, Microsoft Azure, IT systems, MATLAB

WORK EXPERIENCE & PROJECTS

Using LLM as a document Classifier in Python

- Engineered an automated data ingestion pipeline using Python and REST APIs to extract medical preprint abstracts from medRxiv, utilising Pandas to resolve a severe class imbalance by filtering for high-density to ensure statistical validity.
- Fine-tuned a domain-specific LLM (BioMedBERT) for multi-class sequence classification using PyTorch and the Hugging Face ecosystem, managing sub-word tokenisation and tensor padding to preserve complex clinical syntax.
- Designed a custom evaluation framework using Scikit-learn to optimise for the Macro F1-score, successfully diagnosing early-stage model overfitting by analysing divergent training and validation loss curves to inform future hyperparameter tuning.

Deep Learning Image Classification (QuickDraw dataset)

- Developed an end-to-end computer vision pipeline to classify 15 complex categories from a 112,500-image dataset.
- Achieved 92.26% accuracy by implementing a custom VGG-style CNN, utilising targeted dropout layers and early stopping callbacks to eliminate overfitting.
- Engineered efficient data pipelines using stratified sampling and optimised hyperparameter tuning (batch size, dropout rates and architecture) to ensure rapid, stable convergence.

Football Referee, UKC Sports Department

October 2025 – June

- Refereed 11-a-side and 5-a-side tournaments at the University of Kent.
- Demonstrated strong decision-making under pressure, managing player conduct and resolving conflicts effectively during games.
- Developed excellent communication and leadership skills by coordinating players, coaches and match officials.

J Sainsbury's Trading Assistant (days and nights)

April 2021- July 2025

- Adhered to strict organisational policies and safety regulations in a high-pressure environment
- Customer Service: Delivered prompt assistance and resolved issues to enhance customer satisfaction.
- Achieved Sales Goals: Helped the team meet daily targets through efficient stocking and display.

GCB Bank internship, Ghana.

Mar 2019 - Aug 2019

IT support intern

- Provided first-line IT support, configuring and maintaining computer systems and software applications, demonstrating strong troubleshooting skills.
- Efficiently managed several projects in a hectic setting, keeping a high standard of accuracy for data entry and system changes.
- Demonstrated strong customer service skills in a fast-paced environment, managing multiple tasks and maintaining high accuracy in data entry and system updates.
- Utilised strong troubleshooting skills to support technical teams, allowing them to focus on high-level technical responsibilities.
